

October 30, 2023

Dear Clients,

Our intake paperwork informs clients that we will increase our fees by \$10 each year on January 1st, and other fee increases may be possible due to changes in service structure, etc. This rate increase helps us keep up with yearly cost of living increases. We will no longer be offering a \$10 discount for paying at the time of service. This session rate increase does not apply to insurance clients except in the event of a no show or late cancellation in which we charge a full session fee.

We will be implementing this rate increase as of 1/1/2024. Below is a list of our most common rates, listed by clinician licensure:

**Independently Licensed Clinicians, (LCSW-C, LCPC, LPCMH, LPC, LCPAT):**

Intake session fee: \$220

Family session fee: \$205

Regular session fee: \$195

**Provisionally Licensed Clinicians or Masters Level Clinician (LMSW, LSW, LGPC, LAMHC, LGPAT):**

Intake session fee: \$210

Family session fee: \$195

Regular session fee: \$185

If your therapist is provisionally licensed or a masters level clinician and becomes independently licensed the rate increase will occur at the time of the change in licensure.

If you are using a different modality, please consult your provider for the changes in our fees.

We appreciate your understanding our need to increase our fees to offset cost of living increases. We appreciate you, our clients. Please feel free to talk further with your therapist should any questions arise about these changes.

Thank you,

*Rachel Harrison, LCPC, NCC*
